

SUBAIRI

+6283839772172 | subairibairi689@gmail.com | <https://www.linkedin.com/in/subairi/> | <https://portfolio-subairi.web.app/>

Seeking hands-on experience in software engineering to strengthen my skills in designing, developing, and maintaining scalable applications.

Education Level

SMA Negeti 18 Surabaya - Surabaya

Aug 2019 - Apr 2021

High School Diploma

Universitas Pembangunan Nasional Veteran Jawa Timur - Surabaya

Sep 2021 - Jan 2026

Diploma, 3.93/4.00

Project Experience

SubGAME

Game account marketplace

- Tech: ReactJS, Tailwindcss, Tanstack, JWT, Websocket, Pusher, Gin Golang, Gorm, Gomail, Mysql
- Responsive UI/UX optimized for desktop and mobile devices with REST API integration from backend.
- Multi user system (Customer, Seller, Admin) with role-based protected access
- Feature Login, Register, Profile management, Listing & Manage product, Checkout, Orders, Real-time Chat

Growlab

UMKM Course website (Team project)

- Tech: ReactJS, Tailwindcss, sweetalert2, zod resolver, ExpressJS, sequelize, nodemailer, JWT, Multer, Mysql
- Responsive UI/UX optimized for desktop and mobile devices with REST API integration from backend.
- Multi user system (User, Admin) with role-based protected access
- Worked on business class features, including admin course management functionality and ensuring all features function properly on the user side.

Maqis Alhamidy official web

Landing Page & Product showcase of Maqis (Team project)

- Tech: ReactJS, Tailwindcss, ExpressJS, sequelize, JWT, Multer, Mysql
- Responsive UI/UX optimized for desktop and mobile devices with REST API integration from backend.
- Worked on all features, including designing responsive landing pages, managing news content, and developing catalog management functionality.

ANTM Stock price prediction

Machine learning implementation (tesis project)

- Tech: Python, GRU & LSTM Model, Bayesian optimization, Flask, ReactJS
- Processed and analyzed historical stock market data for forecasting and trend prediction
- Optimized model training and evaluation to improve prediction accuracy and performance
- Visualized stock trends, prediction charts, and forecasting results for better user analysis

Skills

- **Frontend development:** Understanding of HTML, CSS, JavaScript, TypeScript, ReactJS, TailwindCSS, responsive web design, REST API integration, state management, component-based architecture, reusable components, custom hooks, TanStack Query, Context, UI/UX implementation, routing, form handling, authentication flow, Debugging.
- **Backend Development:** Understanding of Golang, ExpressJS, RESTful API development, ORM, JWT authentication, role-based access control, middleware implementation, CRUD operations, database design, SQL operations, query optimization, pagination, filter, custom services, file upload handling, WebSocket implementation, real-time communication, server-side validation, error handling, API security, email service integration.
- **AI/ML Engineer:** Understanding of Python, data preprocessing, data cleaning, machine learning /deep learning fundamentals, supervised & unsupervised learning, model training & evaluation, GRU & LSTM models, neural networks, feature engineering, model optimization, forecasting, data visualization, Flask API integration for ML models.
- **Git Version Control:** Understanding powerful version control system to track changes, collaborate with others, and manage my codebase effectively
